PROFILE

Electronics & Telecommunications Engineer (graduated from Ho Chi Minh City University of Technology, 2024) who pivoted into web development, self-taught and building fullstack projects with React, Next.js, Node.js and MySQL. Nearly 5 years of hands-on warehouse operations management give a practical edge in building software around real business problems rather than theory alone. Looking to start a career as a fullstack developer.

SKILLS

- Languages & Frameworks: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Node.js
- Database & Tools: MySQL, Git & GitHub
- AI-assisted development: Claude, ChatGPT, Gemini — used to speed up writing code, debugging, and learning new tech faster
- Other: Team management, fast self-learning of new technologies, translating real operational workflows into software requirements

PERSONAL PROJECTS

WMS Pro — Warehouse Management System *Most treasured project*

Built directly from real needs at the workplace, significantly cutting down process steps and handling time compared to the previous manual approach.

Tech: React, Node.js/Express, MySQL · Demo: https://wms-pro-pnr.vercel.app/dashboard
Backend: https://github.com/NrocneK/wms-pro-backend
Frontend: https://github.com/NrocneK/wms-pro-frontend

BagStore — E-commerce Website

An online store for bags and backpacks, covering the full shopping journey with MoMo and VietQR payments.

Tech: React, Node.js/Express, MySQL · Demo: https://my-bagstore.vercel.app/
Repo: https://github.com/NrocneK/my-shop

My HRMS — Human Resource Management System

A system for tracking and managing employee information.

Tech: Next.js, Prisma, MySQL, NextAuth · Demo: https://my-hrms-one.vercel.app/
Repo: https://github.com/NrocneK/my-hrms

Communix — Real-time Chat App

A real-time messaging application, built with separate backend and frontend.

Tech: Next.js, TypeScript, Socket.IO, WebRTC
Backend: https://github.com/NrocneK/communix-backend
Frontend: https://github.com/NrocneK/communix-frontend

WORK EXPERIENCE

Warehouse Supervisor — Phuong Nam Retail Co., Ltd.
2019 – Present

- Directly managed a team of 5–7 members, responsible for day-to-day warehouse operations.
- Observed bottlenecks in the inbound–outbound–stocktaking process firsthand, which became the starting point for designing and building WMS Pro.
- Applied IT knowledge to optimize real-world operations.
- Since 2021, self-taught programming alongside the management role — from VBA to web app development.

EDUCATION

Ho Chi Minh City University of Technology — B.Eng. in Electronics & Telecommunications
2018 – 2024 · Work-Study Program

Thesis: Research and development of a VoIP switchboard system based on Asterisk.
